

Cognition humaine

SEG3525 – Conception et analyse d'interfaces usagers

Créé et présenté par:

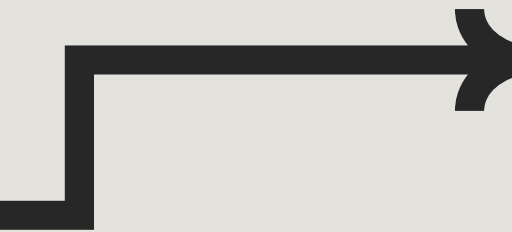

Caroline Barrière

Sommaire

- 01** Introduction
- 02** Six processus cognitifs

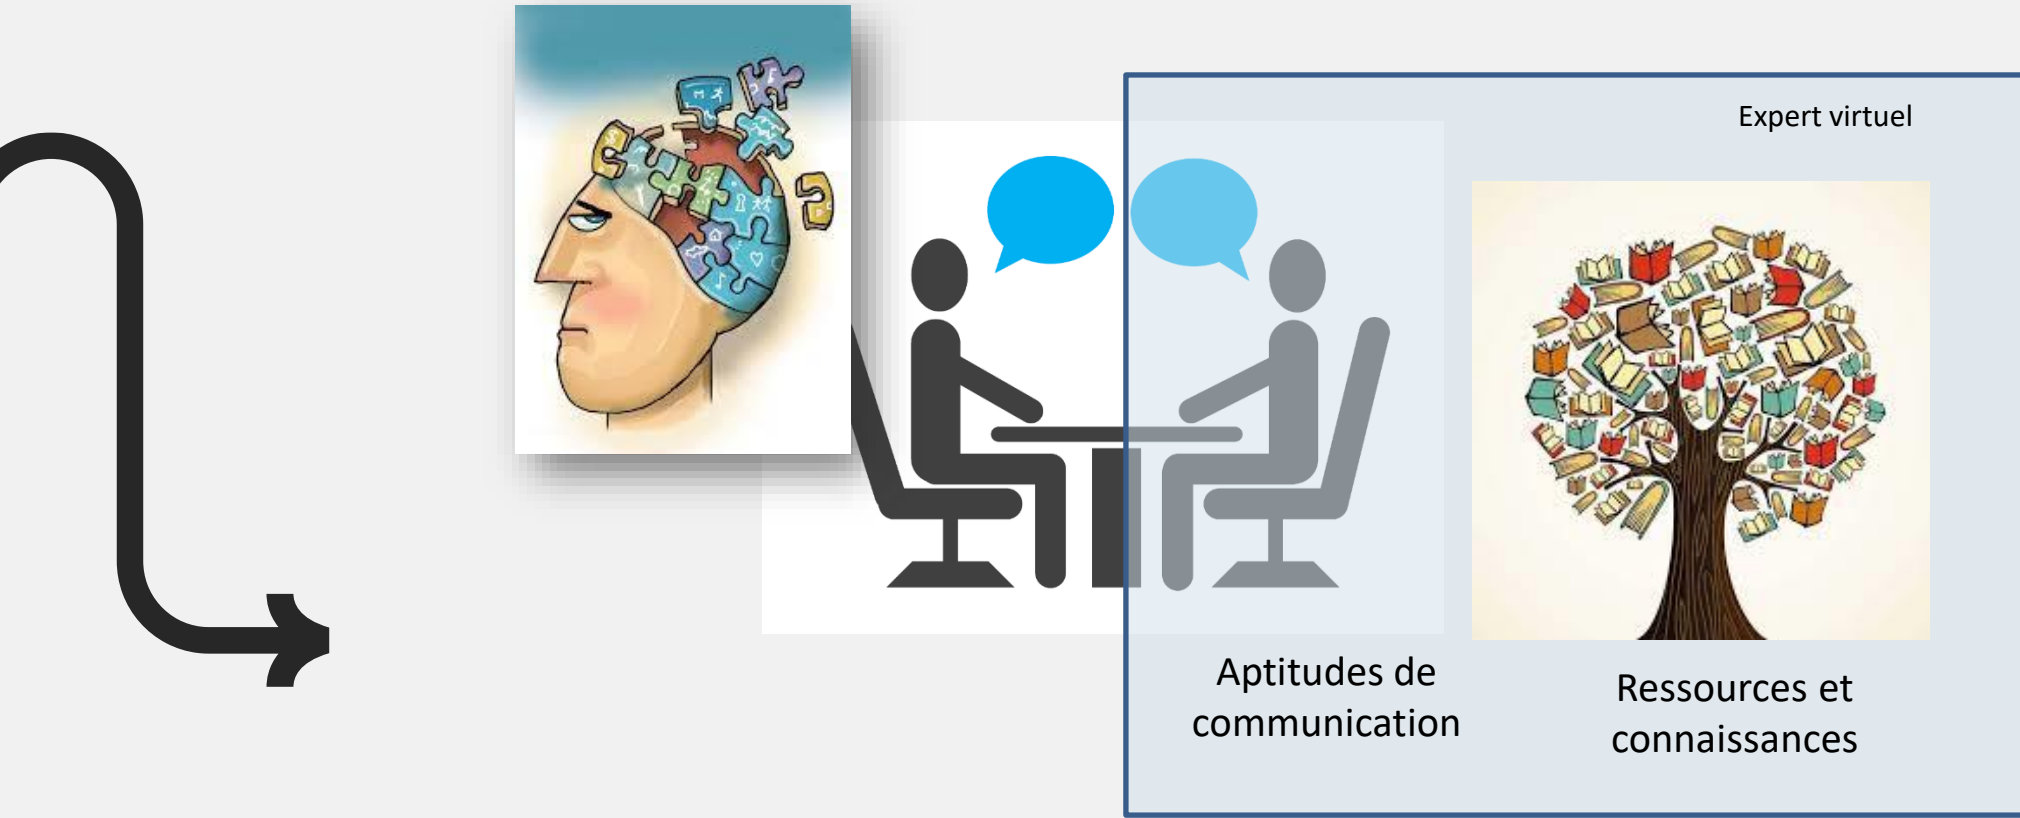

Introduction

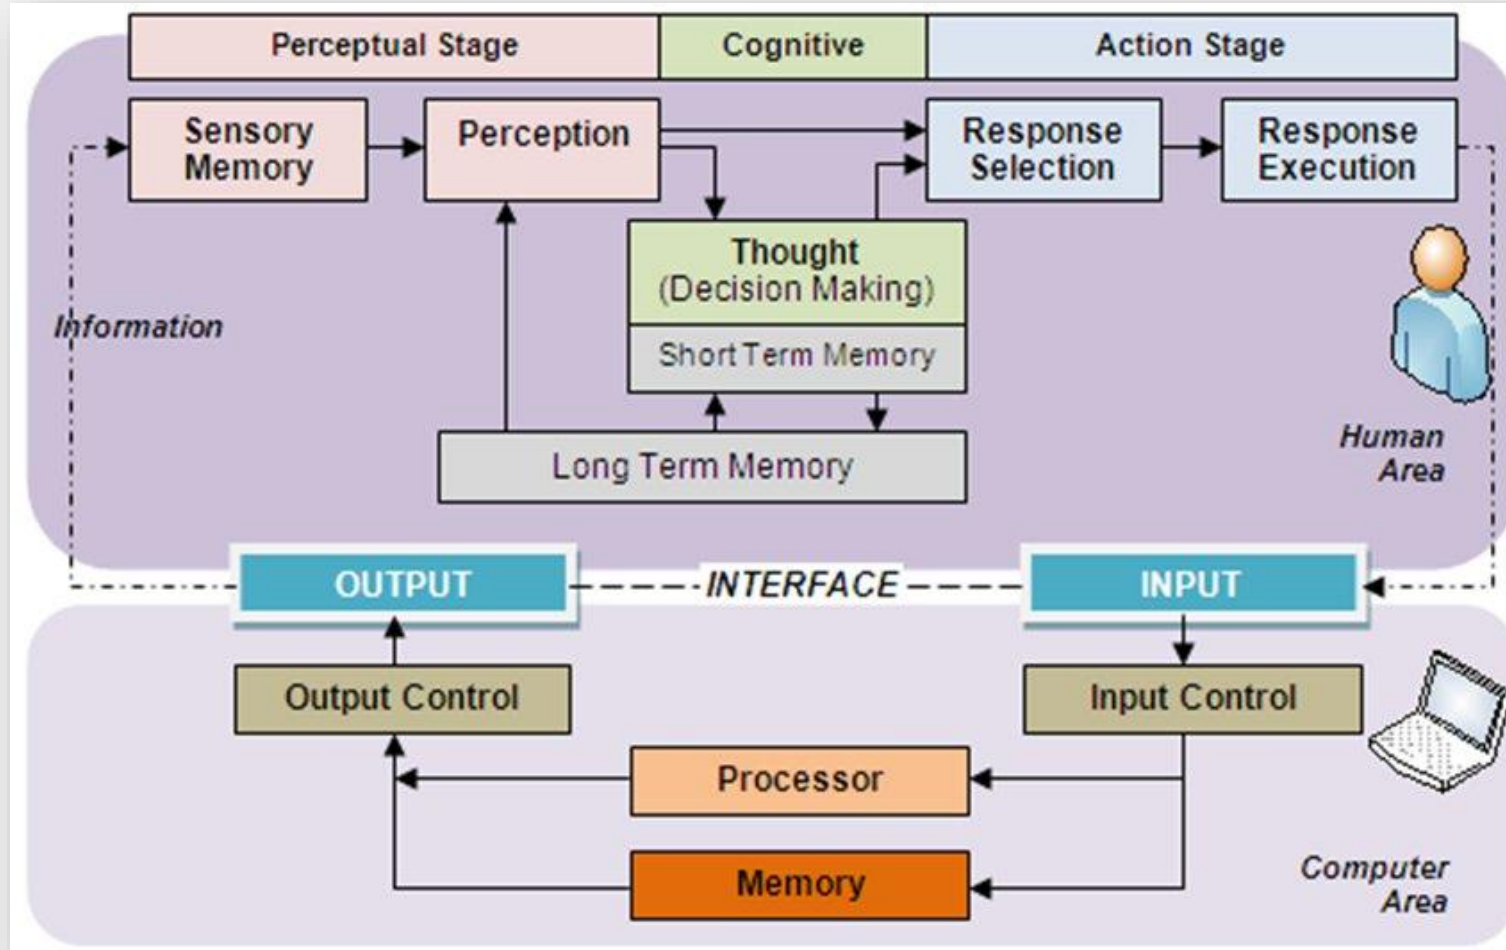

Cette section présente la relation entre la cognition humaine et la conception des interfaces usagers.

Processus cognitifs

Cette section donne un aperçu des six processus cognitifs.

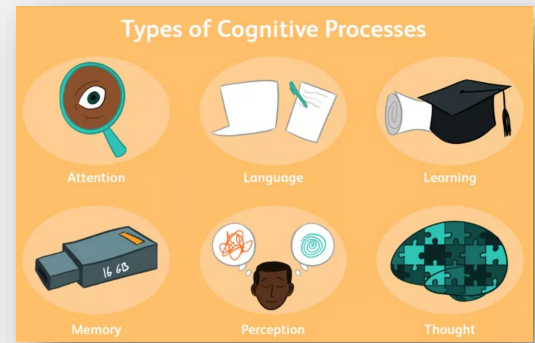

Processus cognitifs

Attention

L'attention agit un peu comme un projecteur, mettant en évidence les détails sur lesquels nous devons nous concentrer et mettant des informations non pertinentes à l'écart de notre perception.

[Image Source](#)

Langage

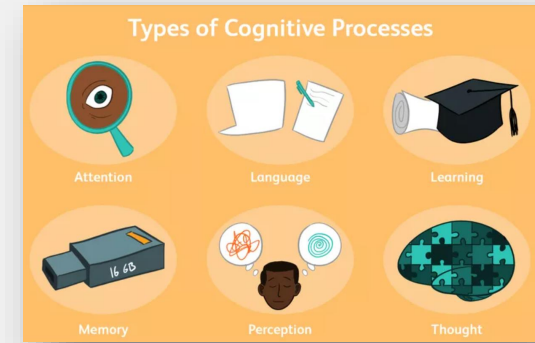

[Image Source](#)

Exemples :

J'ai regardé un film sur Netflix hier soir.

Le serveur ce midi était vraiment gentil et attentionné.

Si le bus n'arrive pas bientôt, je serai encore en retard au boulot.

DEFINITION

IMPLICIT is something that is **implied**, i.e. **not expressed directly but still understood** because it is suggested by the choice of words, the tone of voice,

DEFINITION

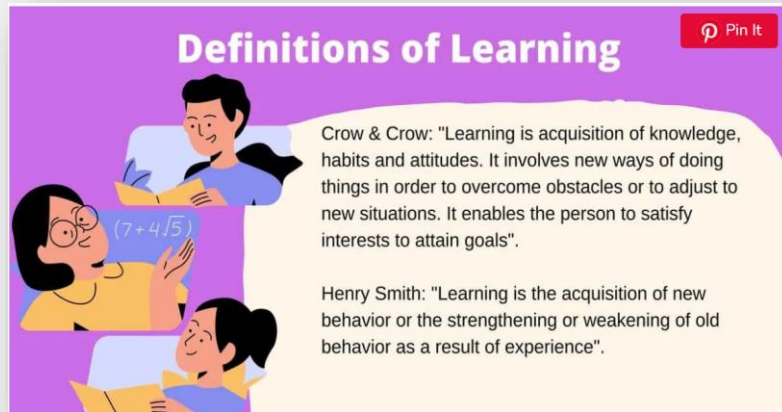

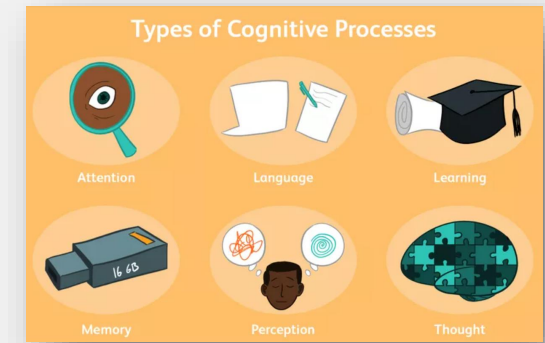

EXPLICIT is something that is **stated directly and fully**, with no room left for implications.

Apprentissage

Crow & Crow: L'apprentissage est l'acquisition de connaissances, d'habitudes et d'attitudes. Il s'agit de nouvelles façons de faire afin de surmonter les obstacles ou de s'adapter à de nouvelles situations. Elle permet à la personne de satisfaire des intérêts pour atteindre des objectifs.

Henry Smith: L'apprentissage est l'acquisition d'un nouveau comportement ou le renforcement ou l'affaiblissement d'un ancien comportement à la suite de l'expérience.

Perception

Sensory information
from the environment

5 senses

1. Visual (sight)
2. Auditory (sound)
3. Olfaction (Smell)
4. Taste
5. Touch

Sensation refers to the physical stimulation of the sensory receptors.

Perception involves interpreting this sensory information.

Perception (visual)

Gestalt psychology

From Wikipedia, the free encyclopedia

Gestalt psychology or **gestaltism** (/ɡəˈtɑːlt, -ˈtɑːlt, -ˈstɑːlt, -ˈstɔːlt/^[1] from German: *Gestalt* [ɡəˈʃtalt] "shape, form") is a philosophy of mind of the [Berlin School of experimental psychology](#). Gestalt psychology is an attempt to understand the laws behind the ability to acquire and maintain meaningful perceptions in an apparently chaotic world.

- Gestalt psychology can provide instructional designers with an understanding of “aesthetic perception and cognition” (Lyons, 2001).
- Aesthetic design theory provides an avenue for visual analysis – using the laws and principles of Gestalt psychology (Haupt & Blignaut, 2006).

Lois dans l'article

1. Simplicité
2. Forme et fond (*Figure and Ground*)
3. Proximité
4. Similarité
5. Destin commun (*Common Fate*)
6. Symétrie
7. Continuité
8. Fermeture (*Closure*)
9. Région commune (*Common Region*)
10. Connectivité des éléments (*Element Connectedness*)

Réflexion

CORE THINKING SKILLS The building blocks of thinking

Aptitudes de réflexion

- Porter attention
- Assembler
- Se souvenir
- Organiser
- Analyser
- Générer
- Intégrer
- Évaluer
