Using "Sign in" vs using "Log in"

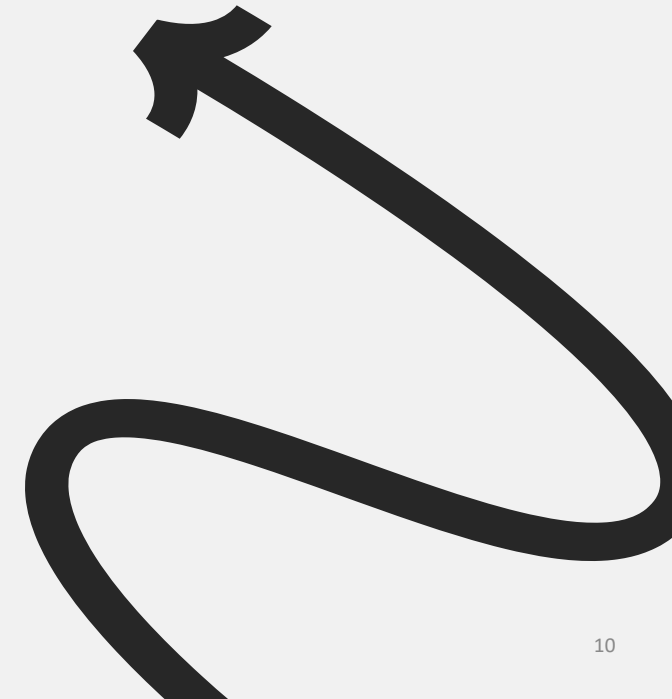

PUBLIC

Asked 11 years, 8 months ago Modified 5 months ago Viewed 156k times

In "[Homepage Usability](#)", Jakob Nielsen (together with Marie Tahir, 2002, p. 53) **recommends the use of "sign in" / "sign out" over "log in" / "log out"**. This is empirically based on a survey of several large-scale websites and thus supports OP's "more common" argument.

Furthermore, I second [@Dan Barak](#) in that you should use "Register" or "Join [your-service-here]" as opposed to "sign up" in order to avoid unnecessary confusion. (I cannot recall whether Nielsen and Tahir had any recommendations regarding *this* issue, though.)

Connotations

Les messages, les boutons et les indicateurs doivent être rédigés dans un langage familier et non ambigu.

Attention aux connotations!!

Guide sur le choix des mots

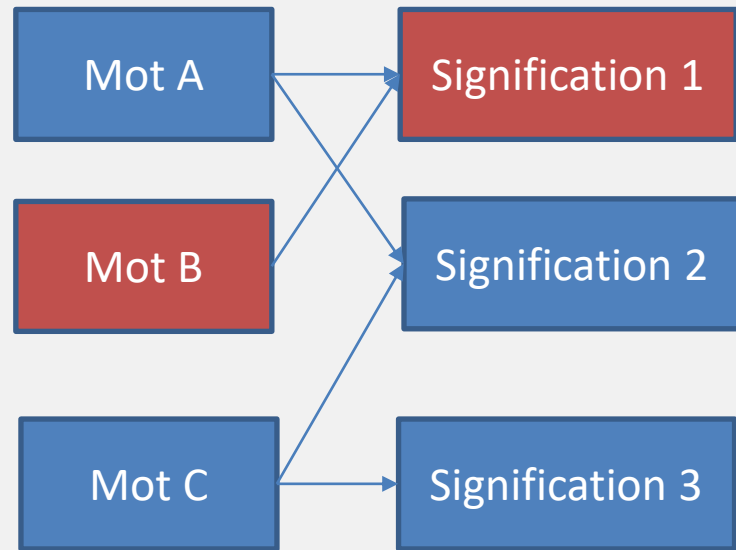

Cette section présente quelques lignes directrices sur le choix des mots appropriés pour une communication verbale productive.

Comment choisir un bon mot ?

- 01 → Privilégiez le terme non-ambigu (s'il existe)
- 02 → Prenez le terme le plus spécifique, à condition qu'il soit compris par les utilisateurs
- 03 → Prenez le terme qui assurerait la compatibilité avec l'organisation des connaissances de l'utilisateur dans l'image du système
- 04 → Utilisez une norme de l'industrie, le cas échéant.
- 05 → Assurez-vous que le terme choisi ne crée pas d'ambiguïté locale en fonction du contexte

01. Privilégiez le mot non ambigu

02. Encouragez la spécificité

Des mots spécifiques, se concentrant sur les actions exactes à effectuer, ont tendance à conduire à moins de confusion et favorisent le rappel.

Exemples:

- *lieu vs destination*
- *insérer vs ajouter*

Confirmer la transaction de 147.38\$?

Oui

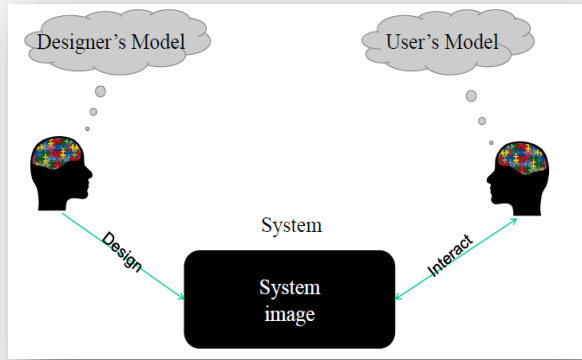

Non

Confirmer le retrait de 147.38\$?

Oui

03. Privilégiez la compatibilité

Mal de tête

Mal de crâne

Migraine

céphalée

névralgie

Mal de dos
